PRIMARY ANTIBODIES
 20, 60, 120, 200 ul

Guaranteed Quality

Validated reactivity and applications (WB, IHC, IF, IP, FC, etc)

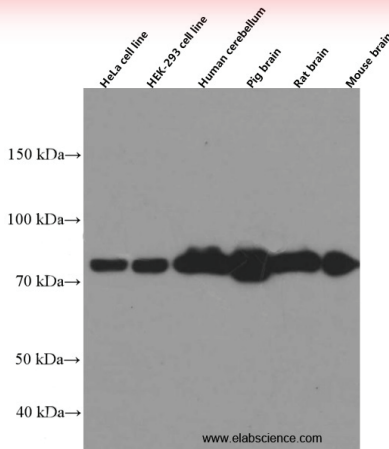

Wide Selection

> 10 000 mono- and polyclonal antibodies available.

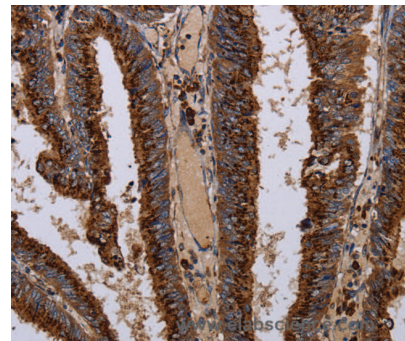

Various Sizes

20, 60, 120 and 200 ul vials.

Western Blot analysis of different cell lysates using PKC gamma Monoclonal Antibody E-AB-27770 at 1:5000 dilution.

Immunohistochemistry of paraffin-embedded Human colon cancer using PPP1R1B Polyclonal Antibody - E-AB-14928.

Customer Review - Québec, October 25, 2017

"Starting from a 100ml culture, we obtained

3 mg of pure DNA using this kit, while we used to get

around 500µg with the kit of competitor Q Filter kits, for the same prep."

PCR, Cloning & Mutagenesis Services

Custom Experimental Design

We design everything for you.
Tailored to your needs.
No need to worry about feasibility

Plasmid Maps

Complete and detailed maps
provided in Snapgene format,
Genbank or Fasta.

Sequencing Results

DNA sequencing is performed at
the Plateforme de Séquençage
du CHUL in Quebec City.

Glycerol Stocks

In contrast to other service providers,
we provide the bacteria glycerol stocks.
Whenever possible, plasmid DNA is maintained
in T1-phage and T5-phage resistant competent cells.

Fair Pricing

Discounts and/or free complementary
products are offered for large projects or
long-term projects.

www.civicbio.com/services/pcr-services/pcr-service-pricing pour plus de détails.

Prices vary according to project scale, insert size, GC content and the nature of plasmids and competent bacteria that are required. From 150 to 900\$ per clone in general, excluding exceptions.

FREE Micropipette or Magnetic Rack !

With a purchase of at least 1000\$ in services, get a free Pipette P series or a MagicPure GQ201 magnetic rack.

MicroPipette autoclavable

P series Variable Volume reg. 120\$
